### The Eco Friendly Bamboo Banner Stand

Introducing the bamboo retractable banner stand - an earth-friendly alternative to conventional display solutions for the exhibit, display and graphics markets.

Primarily constructed of bamboo, the Panda Stand™ is the world's first environmentally friendly retractable banner stand.

The unit is made from 90% renewable resources with a low impact agro-forestry product that offers a natural choice to the increasing "green orientation" of business.

This sturdy and premium portable display unit offers the same high performance attributes as other retractable banner stands. Its precision-engineered retraction system makes it easy and quick to set up virtually anywhere – simply unwind the graphic stored in the bamboo base and insert the support pole. Designed to maximize visual impact, the Panda Stand's eco-friendly style will help to emphasize any message while contributing to a "greener planet". The highly durable banner stand rewinds back into the base within seconds and is easily transported by one person.

## Why Bamboo?

- Fastest growing plant on earth with increasing use as a versatile industrial material.
- Rapid maturity cycle of 3-4 years with the viability to replace wood or metal components.
- Provides a critical component in the balance of oxygen and carbon dioxide in the atmosphere.

### An Earth-Friendly Alternative to Conventional Display Solutions

Please note that the variety of Bamboo used in this product is plantation grown and not part of the Giant Panda's diet.
